

Factor	Good	Average	Poor
Lighting	The road or path is very well lit, with good visibility in all directions (good visibility as being able to see someone coming or see where the path leads).	The road or path is lit, but could have better lighting, or there are gaps in the existing lighting.	The lighting on the road or path is inadequate. There are considerable gaps in lighting, the area is not lit at all or it is not lit well enough to see properly.
Bushes in the area/ near the path	The road or path is open, with no or very few bushes or trees concealing the area or sides of the path.	The road or path is quite open, with some bushes or trees concealing the area or sides of the path.	The path is surrounded by bushes or trees, giving a closed-in impression. Visibility to the sides is limited.
Distance from the nearest Blue Phone	A blue phone is visible or nearby	A blue phone is not visible but you know of one nearby from general knowledge of campus	A blue phone is not visible and you do not know of one nearby
Typical busyness (all times, not just between classes)	One of the bigger roads, with decent foot traffic	More of a side road but receives some traffic	Very much a side path, more of a shortcut for those in the know or rarely sees foot traffic

Other factors which will be independently considered but do not need to be subjectively evaluated: locations of Blue Phones (marked on the map), locations of buildings open at night (marked on the map), locations of previous thefts/incidents as published by Campus Security
